<sup>1</sup> All cannabinoids in their acid forms (ending in "a") are convertible to their non-acid forms via a decarboxylation process (heating). The THC and CBD maximum values reported are the maximum theoretical amounts of THC and CBD the tested product would have if it were fully decarboxylated

<sup>2</sup> S.L. means "Skip Lot". Parameters are being monitored through product qualification testing and are currently in skip lot protocol.

<sup>3</sup> Cannabinoid detected below Limit of Quantitation (LOQ).

<sup>4</sup> Result was acquired by 3<sup>rd</sup> party laboratory.
